

“... 900,000 — 1,000,000 Americans will get sick from drinking contaminated water this year.”

—The Center for Disease Control, Atlanta GA

Why take care of your health—and then destroy it by drinking toxic water?

Dear Bob Livingston Letter Reader,

Even if you're doing everything right—eating healthy... exercising regularly... and taking nutritional supplements—you could be **SABOTAGING** your health without knowing it. How? By drinking water!

Sure, water is **SUPPOSED** to be good for you—but that liquid coming out of your tap may be far from healthy—in fact, in some cases it can be downright lethal!

According to the Center for Disease Control (CDC)... Major Medical Journals... and other experts—good ole fashioned drinking water has now been proven to...

- **Trigger a massive heart attack!** According to the medical journal, *Circulation: Journal of the American Heart Association*, the arsenic commonly found in drinking water has been proven to increase your chances of a heart attack and artery disease!
- **Riddle your body with cancer!** Each and every year over 160 cancer-causing chemicals are flushed into America's drinking water supply!
- **Make your bones CRUMBLE!** *The Journal of the American Medical Association* printed **THREE** separate studies stating that fluoride in tap water can weaken your bones and

increase the likelihood of hip fractures!

■ **Infect your body with deadly parasites!**

According to the Center for Disease Control, 403,000 people got sick in one outbreak from water contaminated with the parasite *Cryptosporidium*. Another 69 died from the infection! That's just one microbe—drinking water can contain a wide variety of microbial contaminants!

■ **And much more!**

Please know this:

What comes out of your faucet is NOT water! It's a toxic soup of chemicals... bacteria... viruses... and heavy metals!

Did you know drinking water is so contaminated that scientists no longer report on “pure” water. Instead, they refer to “Acceptable” and “Unacceptable” levels of contamination!

That's because your tap water can contain a cesspool of nasty germs... bacteria... viruses... heavy metals... and even embalming fluid—for goodness sakes! Here's what may really be coming out of your tap...

- **Toxic Chemicals!** As many as 7.8 BILLION pounds of chemicals are dumped into America's watersheds in a single year! And this is only counting the 650 chemicals

Drinking tap water is like playing Russian Roulette with your health!

Plain ole' tap water sends thousands of people to emergency rooms every year. The viruses and parasites coming out of your faucet can put you at immediate risk of sickness... disease... or worse!

For example...

■ #1 Stomach Infection in Children!

Dangerous rotaviruses—waterborne viruses that infect your stomach and intestines—are the main causes of severe diarrhea in children! According to the CDC it sends 55,000 kids to the hospital every year!

■ **6 Weeks of Nausea!** The CDC says Giardia—a parasite that gets into your intestines—is one of the top waterborne diseases! If you're healthy, the nausea and diarrhea may only last 6 weeks... if you're already battling health problems—it can kill you!

■ Crashes Your Immune System!

Water laced with arsenic, mercury and lead can cripple your immune system! Exposing you to every contagious disease that comes along!

■ And that's just the tip of the iceberg!

Assuming the water coming out of your tap is safe enough to drink is like playing Russian Roulette with your family's health! Every sip you take... every pot of pasta you boil... and every ice cube you put in a drink—is another opportunity for infection and disease to destroy your health!

registered by the EPA as TOXIC to your health—who knows how many other supposedly “safe” chemicals are being dumped!

■ **Infectious Diseases!** A study published in the *American Journal of Public Health* estimates 35% of all gastrointestinal diseases in homes that drink tap water are caused by contaminated drinking water!

■ **Heavy Metals!** Arsenic, lead, and mercury could be in every sip you take—and it doesn't matter if you're on well or municipal water! Heavy metals can destroy your immune system and trigger arthritis... cancer... and a host of other serious health problems!

■ And much more!

Is this what you really want to drink when you're thirsty?

What's more, did you know... Your drinking water can give you cancer!

The Environmental Protection Agency (EPA) estimates that up to 9,300 Americans develop bladder cancer every year from their drinking water! Why? Because of the “Disinfection By-Products” (DBPs) that form in your water when treated with chlorine!

And DBPs are NOT the only cancer-causing chemicals found in your water:

■ Arsenic overload across America!

The CDC reports this heavy metal is proven to cause skin... liver... and kidney cancers! The World Health Organization says, “Drinking-water poses the greatest threat to public health from arsenic.”

■ **Nitrates from agricultural fertilizers!** Runoff from fertilizers gets into groundwater and exposes folks to stomach and liver cancers—as well as non-Hodgkin's lymphoma!

■ **Pesticides in 97% of Midwest surface water!** Studies at the *International Agency for Research on Cancer* reveal that pesticides—extremely common in drinking water—

put you at greater risk of breast and stomach cancers!

- And the list grows longer every day!
But that's not all...

Want to know where you REALLY caught that stomach flu?

As I mentioned before, there's all kinds of nasty bugs that may be swimming in your tap water—and some of the most dangerous ones are viruses! Why?

Because viruses are so small they can slip right through the water treatment process and make their way directly to your home faucet!

And think about this...

- **Hidden cause of unexplained stomach flu!** Most stomach flu is caused by a “norovirus.” This group of waterborne viruses infects your intestines and causes vomiting... diarrhea... nausea... and even fevers!
- **55,000 American children hospitalized every year!** According to the CDC, “rotaviruses”—similar to the noroviruses—but more dangerous—are the #1 cause of severe diarrhea in children. This virus alone hospitalizes 55,000 kids a year in the U.S. Worldwide—it KILLS over 600,000 children each and every year! And it's commonly found in your drinking water!
- **You can even get Hepatitis!** Hepatitis A—a viral liver disease—can contaminate your well water! It'll make you vomit, feverish and even jaundiced if you catch it!

Disgusting parasites and deadly bacteria may be floating in your family's drinking water—and even chlorine can't kill them!

Americans die every year from the numerous parasites and bacteria found in drinking

water. Some of these nasty critters are even resistant to chlorine—the chemical that's supposed to kill them! For example...

- **E. Coli Outbreak!** Every year 73,000 folks are infected when feces and sewage get in their drinking water!
- **Parasite Pandemonium!** A study reported in the scientific journal *Applied and Environmental Microbiology* discovered 97% of America's surface water may be contaminated with cryptosporidium—a potentially lethal parasite!
- **Well Water Warning!** Another parasitic disease called “Giardia”—commonly found in well water—can cause nausea and other stomach problems that last up to 6 weeks!
Plus, thousands of kids are being poisoned by lead in drinking water!

According to the Center for Disease Control (CDC) nearly 900,000 children between 1 and 5 years old in America have high levels of lead in their blood. They estimate 90,000 to 180,000 of those young victims got it from DRINKING WATER!

Your tap water may be traveling through lead pipes—or pipes with solder (used to repair and join metal pipes)—both of which deposit lead into your water.

That means every time you put ice cubes in your child's lemonade... boil the pasta for his dinner... or give her a homemade Popsicle—you could be slowly poisoning your child! What's more, lead has been proven to...

- Lower your child's I.Q. level!
- Impair hearing or the ability to speak!
- Cause lifelong learning disabilities!

Giving your child—or grandchild—pure, lead-free water is critical to their long-term health and happiness!

You just can't rely on America's water treatment systems to protect you!

Now, don't get me wrong, water treatment systems do remove some dangerous bacteria and parasites. But even the best ones can't remove enough contaminants to keep your drinking water safe. Here's why...

- **Parasites resist Chlorine!** Chlorine can kill dangerous organisms in your water. But some deadly parasites—like *Cryptosporidium*—are now RESISTANT to chlorine!
- **Deadly toxins added AFTER water is treated!** Toxic heavy metals—such as lead—get into your water AFTER it leaves the treatment plant! Old lead pipes are still used throughout the U.S.
- **Treatment process creates deadly toxins!** Chemicals—such as chlorine—are used to treat water to make it safer—but those same chemicals can also be lethal!
- **Quality of water treatment varies from state to state!** The EPA documented 103,953 different water treatment violations in 2003 alone! There's just no way of knowing what toxic gunk will come out of your faucet!

Why Bottled Water is NOT the answer!

If you think drinking bottled water is safer than drinking tap water—think again!

The truth is: bottled water is LESS regulated for safety than your tap water. That's because the Food and Drug Administration—not the Environmental Protection Agency—regulates the processing of bottled water. And the FDA imposes far fewer regulations on water bottlers than the EPA does on tap water!

That's not all! Here are just a few of the other problems with bottled water...

- **Most brands are just expensive tap water!** Did you know it's perfectly legal to bottle tap

water and sell it in bottles? In fact, it's extremely difficult to determine which products are legitimate and which ones are scams!

- **It's nearly impossible to regulate the industry!** In fact, 60% to 70% of all bottled water SNEAKS PAST regulations! The *Physicians for Social Responsibility* warns most bottled water comes from states WITHOUT regulatory programs!
- **Contain high levels of contaminants!** In fact, 20% of bottled water brands have been found with HIGHER levels of contamination than state and industry standards allow! The Natural Resources Defense Council (NRDC) performed a test of 103 brands of bottled water and found illegal levels of bacterial and chemical contamination in 18 different brands! That's not the worst of it...

Many of these guys flat out LIE about the source of their water!

One bottler was caught red-handed slapping “spring water” on their labels even though their water came from a well next to an industrial waste dump! And these shysters knew that well was contaminated on more than one occasion!

Other bottlers try to mislead you with their advertising. That may look like Mt. Everest on “Everest Water”—but what's inside is really just Texas tap water! “Glacier Clear Water” doesn't come from a glacier... but from Tennessee tap water! And other bottled water giants don't disclose the source of their water—because it comes from a faucet tap!

The truth about carbon water filters...

If you want to remove bad taste from your water—carbon filters can do the job. But if you want to remove the lead... arsenic... copper... or even parasites from your water—they're virtually useless!

In fact, most carbon filters allow MORE

contaminants into your water! How? Their filters get clogged with rotting organic materials that breed bacteria!

Another drawback is knowing when to replace the filter. Many manufacturers tell you it's when your water starts to taste "funny" or "bad." Frankly, that's poor advice considering these filters stop protecting you long before you notice a difference in taste!

Ultraviolet water filters only do HALF the job...

Ultraviolet water filters are becoming more popular—but they only address half of the problem. It's true they kill the majority of bacteria and viruses—but they do ABSOLUTELY NOTHING to protect you from all those toxic chemicals and heavy metals in your water!

Two thousand one hundred of the dangerous chemicals named in the Toxic Substances Control Act inventory have been found in our drinking water! Ultraviolet water filters don't protect you from any of them. And they're worthless at protecting your family from heavy metals like lead and arsenic!

If you want to make sure your water is free of cancer-causing chemicals—a UV device is pretty much useless.

Reverse Osmosis— A Better Solution? NOT!

Reverse Osmosis (RO) filters force water through a cloth-like filter. It's like forcing water through a fancy cheesecloth to get the dirt out.

But there's one big problem: these filters quickly turn into a breeding ground for bacteria! Every day you use an RO filter is another day your water purity quality drops!

What's more your home's water pressure... temperature level... and even the chemical makeup of your tap water—can drastically reduce the effectiveness of an Reverse Osmosis filter!

Bottom line: Reverse Osmosis filters can't deliver the safe drinking water your family needs! But fortunately, there's one solution that can deliver the goods...

The #1 way to get the purest drinking water available!

There's a simple way to get water that's...

- Up to 99.9% Pure
- Up to 99.9% Toxin-FREE
- Up to 99.9 % Germ... Virus... and Bacteria-FREE

And actually good for your health! How?

Pregnant Women: Protect your baby's health!

Pregnant Women should be particularly wary of the dangers of treated tap water. Pregnant women who drink chlorinated water may experience:

- **14% more birth defects!** Mothers who drink chlorinated water are more likely to have babies with birth defects. The National Institute of Public Health in Oslo reports increases of birth defects like oral clefts, urinary tract and neural tube defects.

- **Increases miscarriages by 16.4%! The California Department of Health Services conducted a study of 5,144 pregnant women. Pregnant women who drank water treated with chlorine during pregnancy experienced 16.4% more miscarriages.**
- **Stunts babies' growth!** Two separate studies—one in Italy in 1996 and one in Iowa in 1992—showed babies are more likely to be born with smaller bodies and heads.

Drink distilled water!

No other water purification technology can guarantee you consistently pure water in every drink! Here's how distillation works:

Step #1: Tap water is boiled. This kills all bacteria... viruses... germs... and other microbial contaminants in your water!

Step #2: The boiled water turns into steam. This leaves dead microbes... toxic chemicals... lead... dissolved solids... and other poisons behind.

Step #3: The steam cools and condenses into droplets of purified water.

Step #4: Finally, the water percolates through an activated carbon filter—made from organic coconut shell—to make sure no pesticides or dangerous organic compounds are left in your water.

This is nature's REAL water purification process—the way water evaporates and falls back as rain! Distilling effectively eliminates the dangerous pollution and contamination and restores water to its pure state! In other words...

...With distilled water—you get the purest,

freshest water available anywhere!

Here's how you can get 99% pure drinking water in your home!

To get pure, fresh distilled water in your home you basically have two choices: Buy it by the bottle, or distill it yourself. But buying in bottles can cause you some serious problems. Here's why...

1. Expensive! The average family uses up to 10 gallons of water a week for drinking and cooking. At \$1.39 for a gallon that equals \$13.90 a week... \$55.60 a month... and whopping \$722.80 each year!

2. Full of Hassle. Lugging bottles from the store... to your car... and into your house week-in and week-out can be a pain. Plus, one gallon weighs more than eight pounds. At 10 gallons a week you're lugging 80 pounds of water every week!

3. Tastes like Plastic. Water stored in plastic bottles often starts to taste like plastic. The longer it sits there, the stronger it tastes. And it's nearly impossible to know how long your water has been sitting in plastic containers! Because bottled water can sit on warehouse

The High Cost of Bottled Water

Cost	1 Year	3 Years	5 Years
Bottled Water Cost <small>(Based on 10 gallons per week at 89¢ per gallon.)</small>	\$463	\$1,389	\$2,315
Waterwise Homemade <small>(Based on national average KWH of \$.0848 U.S. Dept. of Energy.)</small>	\$133	\$399	\$665
YOUR SAVINGS!	\$330 \$71%	\$990 \$71%	\$1,650 \$71%

and grocery shelves for months on end!

So the smart—and economical choice is to purchase a water distiller for your home. That way pure, distilled water is always right at your fingertips!

After extensive research and rigid testing, Health Resources has found only ONE water distiller I'm willing to recommend to my Bob Livingston Letter readers...

It's called the Waterwise 8800 Distiller/Purifier. And hands down, it's the best way for you to get consistently pure water at home.

The Waterwise 8800 Purifier guarantees you're drinking clean... safe water. Because it effectively removes the chemicals... the parasites... the viruses... and all the other things you don't want in your water.

So you can enjoy fresh... great tasting water all the time without risking your health.

And it's really easy to use. You fill the Waterwise 8800 with tap water... push just one button and—voila! In a short time you've got a whole gallon of pure, delicious water ready to use. It's that simple!

5 Great Reasons to Get Your Waterwise 8800 Purifier Today!

Here are 5 reasons why today may be the best time to experience the benefits of a Waterwise 8800 Purifier:

Reason #1: You get the purest, healthiest water possible! The Waterwise 8800 effectively removes the chlorine, fluoride, bacteria, viruses, pesticides, lead and scores of other chemicals and toxins in your water. You can be confident you're doing everything in your power to keep your family safe!

Reason #2: You get great tasting water! The Waterwise 8800 is like having a pure

mountain spring right on your counter top. You'll simply love the taste!

Reason #3: So simple and easy to use!

Safe, pure water at the touch of a button.

Never lug 8-pound gallons of water around again. Never worry about storing all those bottles. And no need to fuss with empty bottles. It's hassle free!

Reason #4: No installation costs or hard hookups! Nothing to put together or hookup! Just plug it into a regular outlet. That's it!

Reason #5: You get the "Cadillac" of water purifiers! The Waterwise 8800 Purifier is the ONE & ONLY distiller/purifier to meet California's stringent certification standards! No other distiller is in the same class when it comes to removing contaminants from your water.

Special Offer for Bob Livingston Letter Subscribers ONLY: FREE Gifts Certificate Worth \$288.75

Normally, this top-notch purifier sells for \$449. But because getting pure, uncontaminated water is so critical to your health... I've arranged

with Health Resources to give my readers a special price.

Even at the regular price, the Waterwise 8800 is a steal compared to buying distilled water by the bottle. Just ask customers like Lisa Preble from American Fork, UT who spent \$30 a week on distilled water before purchasing her Waterwise...

...Or Mike Huffman of Smithfield, VA who spent \$800 a year on bottled water.

So you can see even at the regular price of \$449, the Waterwise 8800 Purifier is a bargain.

But the good news is you won't have to pay \$449! Because as a subscriber to *The Bob Livingston Letter*, you get a **\$50 gift certificate** to use towards the purchase of your very own Waterwise 8800 purifier—PLUS \$238.75 in FREE Gifts!

That means you can get the Waterwise 8800 Purifier for the **LOWEST** price available—just \$399!

Compare that to the \$800 a year customer Mike Huffman was spending on bottled distilled water—and you save \$401! That's **MORE** than the price of your Waterwise 8800 in **SAVINGS!**

And the savings don't stop there! With your Waterwise purifier you'll be saving year after year!

Folks just like you LOVE their Waterwise 8800 Purifier. Just take a look at this...

Here's what just a sampling of customers have to say about their Waterwise 8800 Purifier...

You'll SEE the SLUDGE, MUCK, GUNK and CRUD in Your Tap Water!

Folks using the Waterwise 8800 Purifier frequently write in to tell us is how **SHOCKED** they are to finally see what's really in their drinking water. Here's what they discovered...

The sludge stays in the kettle— not in your body!

"I find **SLUDGE** inside the kettle, which of course is the impurities left behind. I am thankful the sludge is no longer going into my body."

—Deborah R. Sebela, Kailua, HI

Yuk... Yuk... Yuk!

"You would not believe the **CRUD** the Waterwise 8800 takes out."

—Ralph W., Oroville, CA

Works amazingly well to remove impurities!

"After distilling our first gallon of water, I opened the distiller. The stench and brown **MUCK** on the bottom were astounding!" —Roseann D., Bayside, NY

Thank you for a great product!

"We looked at the **GUNK** on the bottom of the distiller. What a sight to behold—it was awful. We are sure glad it's in the pot and not in us. Thank you." —Judy M., Seaford DE

“Water Tastes Better”!

“Thanks, thanks, thanks! I love my Waterwise! Easy-to-use and I use it daily. It saves me drudgery of bottled water and TASTES EVEN BETTER!”

—Barbara B., Middle Village, NY

“Best Distiller I’ve Ever Owned!”

“I’ve had distillers since 1966. THIS is the best.”

—Lafern B., Paris, IL

“The Best Water Possible!”

“We love our Waterwise. The water tastes great and I know I’m giving my family the best water possible!”

—Amy L., Romulus, NY

“I haven’t been sick in 5 years—THANKS!”

“I’ve not been sick or even had a cold in the last 5 years since I bought my Waterwise Purifier. Thank you!”

—Joy M., Round Mountain CA

Enjoy 100 Days of the Purest, Safest Water You’ve Ever Tasted 100% Risk-Free

When a product works as well as the Waterwise 8800 Purifier and you’ve got thousands of customers raving about this remarkable water purification system—it’s easy to offer the strongest guarantee possible.

That’s precisely what you get—a full ONE HUNDRED DAYS to taste the difference the Waterwise 8800 Purifier makes in your drinking and cooking water—completely RISK FREE!

Just call today 1-800-471-4007 or mail the enclosed gift certificate order form today.

You must be delighted with your Waterwise 8800 Purifier or just return it for a full refund within 100 days of purchase. No questions asked. Can Health Resources be any fairer than that?

Plus, you get 5 FREE gifts just for trying out the Waterwise 8800!

As a special thank you for giving the Waterwise 8800 Purifier a fair try, Health Resources will send you 4 FREE gifts...

Free Gift #1: Showerwise Water Filter and Massage Shower Head—valued at \$84—Yours FREE!

Showerwise effectively removes chlorine and other harmful contaminants. Your body can absorb more chlorine in a 10-minute shower than from drinking the same water all day! It also reduces iron, lead, arsenic, mercury, hydrogen sulfide, and several types of bacteria, algae, fungi and mold. Say goodbye to dull hair and irritated, itchy skin with Showerwise. EASY to install and maintain! No special tools required—simply remove your existing showerhead and install the Showerwise. And it’s low maintenance—every 2 or 3 months reverse the filter cartridge to backwash the contaminants. Filters typically need replacing once a year,

depending on your water quality and frequency of use.

Free Gift #2: 3-Month Supply of Alkaline Body Balance™, Nature's Most Amazing Miracle—valued at \$89.85—Yours FREE!

At birth, your body's pH is balanced and may even be towards the alkaline side of the scale—the very model of perfect metabolic health!

But over the years, waste thrown off by your cells builds up inside you, putrefies and turns to acid — which in turn, poisons your cells and wreaks havoc throughout your body:

- In your arteries, it damages their linings and gives plaque a foothold — leaving you vulnerable to high blood pressure and perhaps a blockage of blood to the heart or brain...
- In your joints, it erodes vital cartilage, leaving them inflamed, stiff and painful...
- In your muscles, it causes tremendous damage, leaving you weak and easily fatigued...
- In your blood, it kills immune cells, leaving you vulnerable to infection...

The good news is, it's never been easier to flush deadly acid out of your body, thanks to Alkaline Body Balance™ —the ultimate pH balancing formula!

Alkaline Body Balance™ gives you 72 of the purest and most potent acid-lowering minerals available in an organic colloidal state. That means the minerals are **READY** and **ABLE**

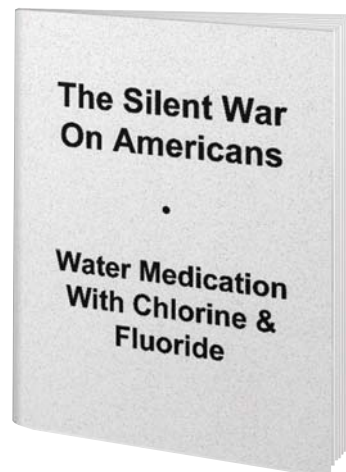

to help balance your pH levels naturally.

THE RESULT: Life-giving minerals, nutrients and oxygen flow throughout your entire body. The acidic waste gets flushed out of your cells and removed from your body. Now, you can experience high energy levels — and you can help fight off the leading cause of most illnesses!

Alkaline Body Balance™ is the perfect complement to your new Waterwise 8800 Purifier. Pure clean water that's perfectly alkaline balanced and enriched with some of the purest colloidal minerals on earth!

Free Gift #3: *The Silent War on Americans—Water Medication with Chlorine & Fluoridization*—valued at \$19.95—Yours FREE!

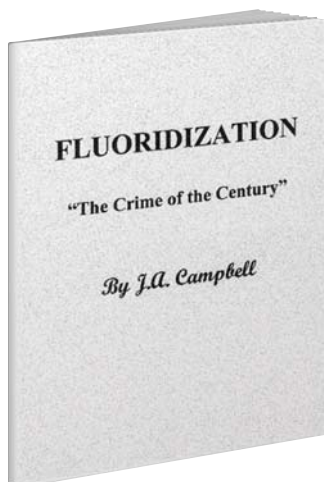

The truth is Americans are being slowly poisoned to death—and the government is taking the lead in “mass medicating” you and your family. In this special exposé, you'll discover how water additives are killing us by the thousands—quietly and with no opposition from the established medical community. Learn the outrageous truth...

- **Heart Attack in a Glass!** Discover the truth behind the forced medication of your water, and how “treating” it serves you up a greater chance for HEART ATTACK!
- **Prison Health Miracles!** Asthma... arthritis... and high blood pressure—all cured without drugs! Learn how a doctor thrown into an Iranian prison—and waiting for the firing squad—discovered the miraculous water cure for these common ailments!
- **The Cholesterol Hoax!** You may be denying yourself of your favorite foods for **NO REASON!** See why you may never have to worry about your cholesterol again!
- **And much, much MORE!**

Free Gift #4: Fluoridization “The Crime of the Century”—valued at \$19.95—Yours FREE!

In this off-the-press special report, you’ll discover a 50-year-old swindle that’s robbing the health... pocketbook... and life of all Americans! You’ll uncover...

■ **Anatomy of a conspiracy!** See how the government was swindled into putting a rat poison into your drinking water under the guise of “protecting” your health. Get the behind-the-scenes look at one of America’s longest running conspiracies!

■ **Why more Americans are wearing dentures!**

Why drinking treated tap water may knock your teeth out!

■ **Hidden cause of diabetes!** Why what you’re drinking—not what you’re eating—can give you a nearly 50% greater chance of developing diabetes!

■ **And much, much MORE!**

Free Gift #5: FREE Shipping and Handling!

That’s right! Order now and you get Free Shipping and Handling no matter where you live! That’s up to a \$25 value, FREE with this offer.

You’ve seen the evidence: Thousands of chemicals, filthy bacteria, dangerous viruses, and toxic heavy metals—all in our drinking water—and putting you at great risk for digestive problems... heart disease... and even cancer!

You’ve seen why distilled water is the smartest choice for pure, healthy water. And why the Waterwise 8800 Purifier is the right choice for distilling water for your family to drink.

And you’ve seen you have **nothing to risk**. If the Waterwise 8800 Purifier isn’t easy to use... doesn’t give you peace of mind... or if it’s not just the best tasting water you’ve ever had—you can return it for a full and complete refund.

Now, it’s time for you to decide: Do you want your family drinking water that puts them at risk of all sorts of health problems? Or, do you want them drinking pure, healthy water?

Don’t wait a second longer. Pick up your

100% Risk-Free, Money-Back Guarantee

You Will Taste the Difference in Your Water—100% Guaranteed!

Call Toll-Free now, 1-800-471-4007, or mail the \$50 Gift Certificate Order Form on page 12. Test drive the Waterwise 8800 Purifier for a FULL 100 days.

You must be absolutely delighted with the quality and pure taste of your water, or just return the purifier for a complete

100% refund—no questions asked.

And you can keep your FREE Gifts no matter what you decide. I think that’s fair, don’t you?

A handwritten signature in red ink that reads "Laysie Lung".

President, Health Resources

phone and call 1-800-471-4007, or mail the \$50 Gift Certificate Order Form below. It's the only way to guarantee your family the purest drinking water possible.

Sincerely,

Bob Livingston

P.S. Maybe you're skeptical about whether all these nasty things really are in your water.

GOOD! That's smart—as a *Bob Livingston Letter* reader, I know you'll NEVER trust your family's health to any unproven promise!

Instead, take the Waterwise 8800 Purifier for a test-drive, completely risk-free for 100 days. You'll see for yourself all the toxic chemicals and bacteria hiding in your water.

All of the nasty gunk in your water will be left behind in the boiling kettle after each use for you to inspect. See the proof with your own eyes and protect your family from toxic water. I was a bit skeptical too... but the proof is certainly there! You won't believe your eyes!

WATERWISE 8800 PURIFIER \$50 GIFT CERTIFICATE

Free Gift Certificate Worth \$288.75!

YES, Bob! I want to eliminate disease causing viruses, germs and chemicals in my tap water and give my family pure, healthy, clean water to drink! I understand this is a totally 100% risk-free offer. I have a full 100 days to try the Waterwise 8800 out and if I'm not absolutely delighted, I can send it back for complete refund within 100 days of my order.

Please rush my Waterwise 8800 Purifier at a FULL \$50 below the regular price. **I pay just \$399.** I also receive:

- A FREE Shower Filter (a \$84 value)
- A FREE 3-month supply of Alkaline Body Balance™ (a \$89.85 value)
- 2 FREE reports: *Fluoridization "Crime of the Century"* and *The Silent War on Americans* (a \$39.90 value)
- FREE shipping and handling!
